

Mine Risk Education

This table is based on *Landmine Monitor Report 2005* and additional research in 2006.

Note that casualty data are often very scanty. Good injury surveillance is lacking in most countries.

	Country/area	Mine/ERW casualties in 2004	MRE 0	MRE I	MRE II	MRE III	NA	MRE not needed ?

Bold: States not party to Mine Ban Treaty

(x) means MRE in this category is limited or less prominent than in the main category [full x].

x does not necessarily mean that MRE provision is sufficient.

* means MRE activities are taking place in areas 'controlled' by Non-State Armed Groups.

MRE 0 = No MRE reported, but according to the threat needed (not just the number of casualties)

MRE I = Basic warnings only often along with marking program

MRE II = Classical lecture type MRE, mostly as stand-alone activity

MRE III Community-Based MRE, often with Community Liaison

NA = Information not available

MRE not needed? x in this column means that for now it is an open question whether MRE is needed or not.
